

What if I get a message that says "I am already logged in?"

- You should go back to the last computer you were using and login and logout again. This must be done at the same, exact computer even if someone is currently using it!
- This problem may have been caused by:
 - *not quitting all applications before logging out.
 - *closing lid on iBook before screen went black.
 - *leaving an Accelerated Math scanner, document camera or flatbed scanner plugged in before you logged out.
 - *bad luck!
